

The Kielce University of Technology is the oldest University in the region continuing the tradition of the first technical university in Poland - Academie of Mining (established in 1816) The University has an established, high reputation among employers. Opened in 1974 and based on traditional engineering fields of study, the University intends to develop as a higher technical school open to tasks extending beyond classical technical sciences. The major goal of the University is to pursue education, learning, and research at the highest levels of excellence.

It is achieved by constant professional development of the staff, close inter-relationship between teaching and research, cooperation with other research centres and partnership with business.

Fulfilling the mission with the active participation of the whole academic community, KUT collaborates with the authorities of the central and local government, the city and social organisations.

The Kielce University of Technology consists of five faculties:

- **Faculty of Civil Engineering and Architecture,**
- **Faculty of Electrical Engineering, Automatics and Computer Science,**
- **Faculty of Environmental Engineering, Geomatics and Power Engineering,**
- **Faculty of Mechatronics and Machine Design,**
- **Faculty of Management and Computer Modelling.**
